

# Kit LCD monitor support kit for Sony FX6 & FS5

When the optional Sony eyepiece is used on the Sony FX6 LCD monitor, this bracket offers additional stability and an adjustable friction needed to support the extra weight of the eyepiece. This kit includes a robust and longer 8T to 15mm bracket.

This kit includes our 56mm long Sony 8T to 15mm viewfinder bracket. This viewfinder bracket replaces the original Sony PXW-FS5 or FX6 viewfinder bracket and offers a stronger, 30 mm longer connection.
